

POLYURETHANE BEARING

Polyurethane bearing is widely used for currency counting machine, ATM, Paper Currency Sorter, Window, Door, Drawer, Cabinet, Elevator, Medical equipment, Conveyor belt etc.

It has two types: Flat type and dent type. Flat type means PU and inserted bearing is in same height. Dent type means PU height is taller than inserted bearing. Each type Polyurethane bearing can add screw, Stainless steel screw or Carbon steel screw for select. Different colors are available.

Customized polyurethane bearing is welcomed, just tell us the Bore Diameter(ID), Inserted Bearing Outer Diameter(BD), PU Outer Diameter(OD), Bearing Width (WD) and which type, we will design your own bearing without minimum order quantity requirement.

Model	I.D. (mm)	O.D. (mm)	Width (mm)	Internal Bearing	Bearing Accuracy	Shore Hardness	Weight	Type
